Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

Applicant's election with traverse of claims 1-8 in Paper No. 5 is acknowledged. The traversal is on the ground(s) that the examiner did not specify any claims as the single combination, or any disclosure as the single combination. This is not found persuasive because the argument is not pertinent to the type of restriction requirement made. Under MPEP 806.05(d), there is not a burden for the examiner to specify a single combination.

The requirement is still deemed proper and is therefore made FINAL.

Claims 9-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 5.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Clark.

Regarding claims 1-3 and 8, Clark teaches a wire tensioning device comprising a wire (11) having two ends with at least one end being mounted in a moveable fashion and at least one end mounted in a fixed fashion (Paragraph 9), a slide block (22) which

Art Unit: 2881

slides parallel to the wire in grooves 25a on slide pin (28), and compression springs (23) mounted between the machine and slide block within grooves 25a such that the spring exerts force in the opposite direction of tension the wire exerts on the block (Col. 6) such that desired tension is kept on the wire. Wire ends are inserted into slots in the at least one slide block having a slot wider than the means for attachment, such as the knotting or crimping disclosed in Col. 6.

Regarding claims 4-6, the device of Clark comprises a holder (21) which contains grooves (25a) and springs (23). The holder is fixed to the device, and the springs are between the holder and the slide pins (28), the slide pins being mounted on the slide block (22).

Regarding claim 7, the slide block of Clark is v-shaped, has two legs, the leg containing the wire angling away from the wire (Fig. 5).
